

Internship: Embedded Software Development Environment (f/m/div)*

Job description

Do you want to get deeper insights into embedded software development environments? Then this is the perfect internship for you. Our Team in Munich is looking for a committed student who has already gained some experiences in embedded programming projects, programming languages and continuous integration tools. This sounds interesting? Apply now! We are looking forward to your application!

In your new role you will:

- Implement **custom solutions** for **specific tasks** in current **running projects**
- Receive the **specific requirements** for running many **Bitbucket operations** via **command line**
- Deploy the **solution** using **Python** and respect the **in-house coding guidelines**
- **Document** the given **solution** using **Doxygen**
- **Support** our **methodology engineers** improving the methodology framework and its documentation (Confluence pages)

Profile

You are best equipped for this task if you:

- Possess a **talent** in **software development**
- Already have realized several **writing software projects**
- Are experienced in **Python** programming as well as in **C/C++**
- Speak **English** fluently

Please attach the following documents to your application:

- CV in English
- Certificate of enrollment at university
- Latest grades transcript
- High school report
